organizzazione di produttori

ALTAMURA

organizzazione di produttori

We are a **producer organisation** and we have put together the **best farms** in the Piana del Sele. Our crops are immersed in those fertile hills, halfway between the Amalfi and Cilento coasts, on a surface of over 400 hectares. We are specialised in the production of **baby leaf**.

O.P. Altamura was created with the aim of get strong the farmers field of leafy vegetable on the Piana del Sele, creating a model that, thanks to our twenty years of experience in the production and marketing of baby leaves, can give widespread development and professional growth of all participating producers

Alfonso Altamura, President, OP Altamura.

We have been taking care of the growth of our leafy vegetables for three generations. We produce over 50 varieties of baby leaves with the integrated defence method that safeguards man and the environment. 20% of our fields are used solely for organic farming production. We combine the power of nature with the latest technologies to conserve the raw materials we distribute in over 28 countries worldwide: products for industry and medium and large-scale distribution. Our goal is to keep the leaves fresh and natural from the field to the table.

We sow quality,
we harvest goodness
We are ploughing the furrow
for a new kind of farming

We plant only the best seeds in order to obtain high quality leaf crops. We work with computer systems of the latest generation, sprays that spray our water on the seedlings until they are picked by the electric harvester. We work with 80 tons of raw material per day on 5 production lines, with the latest machinery housed in 2 plants. We monitor the crops by performing constant checks with optical selectors during the processing and packaging process to rule out the presence of foreign bodies. We keep the cold chain constant, with temperatures between 2° C and 5° C in all phases of the production cycle, to preserve the quality of raw products.

ALTAMURA
organizzazione di produttori

We protect our crops with the precautions and care necessary to safeguard the rhythms of nature. We use latest generation production systems to process the raw materials within few hours of harvesting and deliver them throughout Europe. The most modern technologies to preserve quality. We follow the seasons and take care of the land to bring only the best to your table.

We preserve the generosity
of our land in different
packaging solutions

To ensure each range is conserved
at its best, we use different methods
of packaging depending on the
destination of our leaves. **The right
means for the best taste.**
